

Use Case Ban Fan

Nicholas Nolen

Actor

Admin

Preconditions

1. An Admin has logged into the system.
2. A report has been made against a fan.

Postconditions

1. Admin has reviewed the report.
2. Fan is either banned or the report is declared invalid.

Main Flow

1. The admin selects the option to review open reports.
2. The admin selects a report.
3. The admin reviews user submitted reasoning for the report along with related material.
4. The admin reviews the automated AI recommendation for how to proceed.
5. The admin selects an option to proceed with banning the user.
6. The system logs the banned user out.
7. The system removes the user's ability to log into the website.

Extensions

1a. No reports

- 1a1. The system shows no open reports.
- 1a2. The admin closes the reports tab.

5a. Report is invalid

- 5a1. The admin selects an option to mark the report as invalid.
- 5a2. The system logs the report as invalid and removes it from the open reports list.
