

Use Case Add Event

Nicholas Nolen

Actor

Artist

Preconditions

1. An artist has logged into the system.

Postconditions

1. An event has been added to the events tab in the artist's profile.

Main Flow

1. The artist selects the add event option in their profile.
2. The system prompts the artist to fill in the event information (e.g. event type, description, date, time, relevant images/flyers).
3. The artist enters their event's information.
4. The system validates the input.
5. The system prompts the artist to review their event details.
6. The artist acknowledges they reviewed their details and submits the event.
7. The event shows up on the artist's profile to everyone who views it.

Extensions

5a. Invalid input.

5a1. The system detects invalid input.

5a2. The system displays an error message and requests the artist correct the issue.

6a. Artist fails to acknowledge

6a1. The system displays an error message stating the artist must acknowledge they have reviewed the details of their submission before submitting.

6a2. The artist acknowledges their review.

6a3. The artist submits their event.
